

Disabling Print Director on Lexmark devices

Disable Secure Document Release in Resource Manager

- Open **Resource Manager** (Start > Programs > Print Director 2 > Resource Manager).
- Navigate to **Print Management > Shared Devices**.
- Double click the device on the right.
- Click the **Controller** tab.
- Click the **Printing** tab.
- Ensure **Enable Secure Document Release** checkbox is unticked.
- Click **OK**.
- Click **PDAgents**.
- Right click the print server on the right and choose **Refresh**.

To stop PD from tracking the print queues for that device, simply delete the Shared Device from the list.

Remove the embedded application from the Lexmark printer via the web interface

- Open a web browser and enter the IP address of the device in the URL and press enter.
- Click **Apps**.
- Click **Print Director Lexmark Integration**.
- Click the **Stop** or **Uninstall** button.

Remove the embedded application from the printer from within maintenance mode

If you don't have access to the printer's web interface, the application can be disabled by disabling all LES applications in maintenance mode.

- Power off the device from the main switch.
- Hold down the numbers **2 + 6** and then power the device on again. Keep holding **2 + 6** for at least 30 seconds after powering the device on.
- Once Maintenance Mode has loaded, scroll down to **LES Applications** and set it to **Disabled**.
- Press **Submit** and then **Exit**. The device will reboot.
- Once it is fully powered up, configure its network settings so the web interface can be accessed.
- Follow the instructions above to remove the **Print Director Lexmark Integration** application.
- Once complete, power the device off and then power it on again holding **2 + 6** for at least 30 seconds.
- In Maintenance Mode scroll to **LES Applications**.
- Set it to **Enabled**.
- Press **Submit** and then **Exit**.
