Konica Minolta models supported by Print Director Integrated

These Konica Minolta models can run the Print Director embedded apps (Print Director Integrated). Model names are listed without the *bizhub* prefix.

If a model is not listed, ask your Print Director partner. When you click **Gather info** on a printer in Resource Manager, the **Product name** and the function versions of its apps are shown; see *How to set up Print Director on a Konica Minolta printer*.

The same models sold under the Develop (ineo) name are supported too.

A4 multifunction printers
